

Table of Contents

A collection of operational frameworks, governance models, and machine-readable constraints developed to scale a **Self-Healing Organization**. To gain a broader understanding of how these components govern agentic pipelines, reference the **Zone 1 Vision** and the **Global Assets documentation**.

Repository Structure

📁 zone-1-vision-and-narrative/

This directory establishes the macro-strategy and narrative rigor required to secure a Northstar vision strategy and scale the AI Context Vault.

01-strategic-engine-who-and-why.md
Establishing the core engines and the organizational stakes

✓ WIP

02-horizon-vision.md
Defining the macro-strategy

✓ WIP

03-ai-context-vault.md
Scaling the organizational memory

✓ WIP

📁 zone-2-operational-leverage/

This directory defines the operational frameworks that eliminate organizational churn and empower domain leads to execute scalable cross-pod initiatives.

01-foundational-autonomy.md
Eliminating churn. Unblocking domain leads

✓ WIP

02-scalable-initiatives.md
Empowering leads to own cross-pod execution

✓ WIP

📁 zone-3-infrastructure/

This directory contains the structural engineering, defining the cross-functional units, governance models, and rules of engagement for human/AI crossovers.

01-pod-governance.md
Rules of engagement and human/AI crossovers

✓ WIP

02-systems-architecture.md
The structural engineering of the org

✓ WIP

03-autonomous-pods.md
Defining specialized agentic units

✓ WIP

📁 zone-4-self-healing-ecosystem/

This directory outlines the continuous agentic loop, mapping the sequential workflows from telemetry and drift detection through zero-handoff execution.

01-detect-telemetry-and-drift.md
Telemetry & drift detection

✓ WIP

02-analyze-context-diagnostics.md
Context diagnostics

✓ WIP

03-repair-agentic-formulation.md
Agentic formulation

✓ WIP

04-self-heal-zero-handoff.md
Zero-handoff execution

✓ WIP

05-merge-system-deployment.md
System deployment

✓ WIP

Global Assets

These global assets are created to host standardized architecture diagrams, machine-readable design constraints, and context engineering assets for cross-functional pods.

01-design-ruleset.md
Design constraints for governing LLM outputs

✓ WIP

02-context-engineering-deck.pdf
Executive presentation on anchoring non-deterministic AI logic

✓ WIP

03-agentic-pdlc-diagrams.png
Architectural flowcharts for zero-handoff pipelines

✓ WIP

04-cursor-mcp-prompts.md
System prompts and boilerplate setups for prototyping in code

✓ WIP
